IDAHO MINE OPERATOR.

A. F. Stevens Stops Off Enroute from California.

Guich Mining company, organized in this city several months ago by Mr. Stevens and a number of Salt Lake as-sociates, is practically all the interests he has left in the famous Idaho district.

This property is located near the Black Jack mine of the Trade Dollar com-pany. An energetic campaign of de-velopment is going on there and, he states, the results being obtained are

very satisfactory; giving every promise out that the Utah people who have

joined him in the enterprise will be well

A. F. Stevens, who for a number of

ELECTRO

CONDITION OF COPPER MARKET

Notwithstanding the Increased Production of Metal Surplus Stocks are Low.

WHAT MONTHLY PRODUCTION IS

Tremendous Demand Has Exceeded Output of Copper in This Country -Exports Will be Reduced.

Notwithstanding the fact that in the refined copper industries the high prices prevailing have stimulated production in the United States, British Columbia and Mexico, so that the output is the greatest in the history of the industry, surplus stocks in the hands of producers Regular call 2,700 \$ 230.00 Open board 8,600 1,232.38 have been materially reduced since the first of January.

The commercial position, as well as the statistical facts, has enabled both first and second hands to realize high-er prices for all kinds of metal for al-most any delivery, and the prospect seems to be according to the New York Journal of Commerce and Com-merce and Commercial Bulletin, that even higher prices will prevail within the next few weeks—at least 15½ cents cash New York for electrolytic and possibly more.

possibly more.

It is estimated that the production of United States copper mines at the present time ranges from 34,000 to 36,000 gross tous per month, the average being about 35,000 tons, which indicates an increase of 10 per cent as compared with 1904 output. Returns from the principal producing states, including Montana, Arizona, Michigan, Utah and California substatistical productions. California, substantiate these estimates, and there has probably been an increase of output in the minor producing states. In round figures, production is now proceeding at the rate of \$30.

000,000 pounds annually. 000,000 pounds annually.

The tremendous development in electrical industry in the United States during the last seven months, however, has brought a large increase in the smelting of copper. There has also been expansion in other industries, especially in brass foundries, so that it is pounds per month, or 22,321 gross tons. Official returns have shown that we have exported an average of 21,634 gross tons per month, or a total domestic and foreign consumption of 43.955 tons monthly. In other words, we have conmonthly. In other words, we have consumed about 2,000 tons per month more than we have produced, including imports, thus far this year. This indicates that surplus stocks since the first of the year have been drawn upon to, the extent of 14,000 tons. In addition, the largest producers have disposed of 19,000 tons to second have disposed of 19,000 tons to second have so that we 10,000 tons to second hands, so that, so far as producers are concerned, stocks have been reduced about 25,000 tons. The surplus is well distributed, so that very little copper is in possession of any one company and its second. banks to keep a reserve to meet con-

It is claimed that from now on ex-forts will be reduced because of the heavy contracts placed by domestic consumers, but much will depend upon the amount of copper in the hands of dealers and speculators.

The most important development,

among unusual events in July, has been the sudden change in the attitude of domestic consumers. Instead of con-fining purchases to a hand-to-mouth basis, as was the case in May and part basis, as was the case in May and part of June, they contracted heavily for the next three months, even going beyond their former practise of purchasing for 60 days in advance of their requirements. It is estimated, therefore, that fully 66,000 tons of copper have been purchased by American melters alone during July, and, as has been previously noted, there has been some important buying for shipment during the last quarter of the year.

LITTLE LIFE TO STOCKS.

Columbus Con. Goes at \$1.30 Per Share On the Open Board.

The trading in mining stocks was not The trading in mining stocks was not very brisk during the forenoon. During the regular call, Lower Mammoth and Little Chief were the only sellers. On the open board Columbus Consolidated did some business at \$1.50 a share, while Lower Mammoth found some demand around 28 cents a share and better. May Day stiffened to \$1/90. Only quotations were made for the Nevada stocks listed on the board; just as has been the case for some time past.

The closing quotations and sales were

CHIQUITA LOOKS LIKE A BIG MINE.

Development of this Good Springs Property Has Been Decidedly Satisfactory.

TUNNEL IN A BIG ORE BODY

The Extent of Which flas Not Yet Been Ascertained-Broker Oberndofer Enthusiastic.

Late developments at the Chiquita mine in the Good Springe, Nev., district are of a character which cannot help but inspire those who are shareholders in it with confidence.

Joseph Oberndorfer, one of the Salt believes theh Chiquita is going to become a mine of considerable magnitude.

"We don't know," said Mr. Oberndorfer today, "whether we are drifting or cross-cutting it is a said shorts. or cross-cutting the ledge. But we do know that the whole face of the tunnel is in ore and that we have it on the top, bottom and sides. A recent sampling of the face revealed the pres-ence of values averaging \$33.60 to the

"What are we doing with the ore being taken out of the tunnel? Well, we are piting it up on the dump, and it will be marketed later," continued Mr. Oberndorfer. "I suppose we have fully two carloads on the dump now; ore that has been taken from the tunnel during development."

A cross-cut will be started soon in order to determine the extent of the ore body now being opened.

The development of the Chiquita was undertaken several months ago, and no property in the Good Springs district, it is said, has yielded to development more gratifyingly than this one has since work was first inaugurated. Harry S. Joseph is extensively interested in the mine as a characterist. contained is to have a new electric power company, another railway, and a cyanide and chiorination plant of 500 tons daily capacity, says the Goldfield News. Three million dollars has been pledged to carry the project through, and if ten times that amount was required the parties back of it would have no trouble in raising the propers. no trouble in raising the money. Millionaire coal, iron and oil men will control the affairs of the company. For the past six months Col. Ed. F. Browne and J. M. Hower, Jr., president and principal overset. dent and principal owner of the Dor-cas mill at Florence, Colo., have been giving careful attention to the project. ry S. Joseph is extensively interested in the mine as a shareholder.

Mining Deed Filed.

giving careful attention to the project. They have secured over 1,000 acres of coal land near Coaldale, 47 miles in an air line northwest of Goldfield. The land has been paid for and prospected, and in a blanket vein which has an average thickness of five feet coal that will do for steam purposes has been proven up in a dozen or more places. The coal has been tested here and in Pittsburg, and the experts who have made the tests all agree that it will answer the purpose, even if the grade is inferior to the steam coals of Pennsylvania and of Colorado. Special fire grates will be built for the bollers for its consumption. Water has also been Special Correspondence. Provo, Aug. 10.—Gust W. Malmborg of Park City has quit-claimed, for a consideration of \$275, to John Peterson, an undivided one-sixteenth interest in the following mining claims situated about one mile southerly from Castilla Springs, Utah county: The Golden Starr, West Bell, Gold Crown, Golden Gate, Black Bear and Utah Star.

Uncle Sam Dividend.

grates will be built for the boilers for its consumption. Water has also been developed on the ground and it is estimated that it can be pumped to the mill at a cost of three cents for each 1,000 gallons. An electric railway will be constructed from the mill to Goldfield, and a preliminary survey has already been made. It was found that it would take about 60 miles of track, as all the heavy grades will be avoided, thereby saving a large amount in the The directors of the Uncle Sam Consolidated declared a dividend at the meeting held yesterday afternoon. The amount is \$5,000, or 1 cent a share, and is payable on the 18th inst. The trans-fer books close next Saturday.

CONCENTRATES.

C. K. McCornick is expected home

grading expense and the power required to pull the trains. Electric power for mines and lighting purposes will also be furnished, and the company will become an active competitor of the Neva-M. M. Johnson of the Newhouse staff has returned from the Northwest. The Mysterious Slide property in the Thunder Mountain district is to be equipped with a milling plant.

come an active competitor of the Neva-da Power company, whose line from Bishop Creek, Cal., is about completed. The construction of this mill and the building of the railway will be halled with delight by every resident of the Goldfield district, and especially by the mine owners, who will then be inde-pendent of the smelter trust and their exactions. J. H. Paris, formerly identified with the mining interests of Boxelder county, but now of Trinity, Cal., is in

The ore and bullion settlements reported late yesterday by McCornick & Co, were: Crude ore and concentrates, \$54,700; base bullion, \$37,600.

President L. C. Huck of the Annie Laurie Mining company has arrived from the east, and is sizing up condi-tions at the property of the company at Kimberley

Prof. Blackmar, who is identified with the University of Kansas and who has invested quite extensively in western mining enterprises, is in the city on his way to the coast

A report from American Fork canyon says a two-foot vein of galena ore carrying some copper has been opened in the Bog mine. The property is un-der bond to Ohio parties.

A. F. Stevens, who for a number of years has been prominently identified with mining in the camp of Silver City, Ida., is in the city on a brief business trip, having stopped off on the way to the northern district from California, where he recently established his home. Mr. Stevens several months ago sold out his interests in the Addie mine at Silver City to A. J. Orem and associates, of this city and Boston, after developing it from an inciplent prospect to a dividend payer. In this transaction he cleaned up-a snug sum of money; a part of which he has since invested in California ranch property. The stock he now holds in the Rich Gulch Mining company, organized in The big mills of the Coeur d'Alenes are beginning to experience a water shortage. The Rex plant has been forced to close down. Unless there is precipitation soon, others are likely to either reduce the tonnage or go out of

Officials of the Cornstock mine in-spected the zinc mill of the Western Ore Separating company yesterday. The Comstock ores carry considerable zinc, and a trial shipment will be sent to the local plant soon to see what can be done with it. done with it.

A correspondent writing from Hailey, Ida., says an excellent body of concentrating ore has been opened in the Dallas mine, situated in the Hailey gold belt, about eight miles from the town of Hailey. The property is soon to be equipped with milling facilities.

R. L. Colburn and wife left for an extended vacation trip this morning The coast cities will be visited first and then the fair at Portland will be at tended and from there a trip to Nev York and to other eastern points wind up the tour. Goldfield News.

George F. Waddell, M. E., formerly o Butte City, Mont, but now the Salt Lake representative of the Power & Mining Machinery company of Cudaly, Wisconsin, and the Rand Drill company, is in Goldfield in the interest of those corporations.—Goldfield News.

A typographical error which crept into last evening's "News" made it ap-pear that President Knox of the Monthat President Knox of the Mon-tana Tonopah Mining company is in a contest to succeed himself. While his name has been mentioned in that ca-pacity, he does not wish it understood that it is a personal matter with him; that the recent circular sent out to sharcholders clearly defines his position in the matter

The work of cyaniding the tailing pit at the Janet company, or Half Moon mill, stopped on Tuesday. The extraction was not uniform and it was deemed best to stop the work until another run of the mill is made. The old tailrun of the mill is made. The old tailings worked up reasonably well, but the fresh tailings from the mill falled to yield to the cyanide treatment. It is thought additional concentrating tables must be added to the mill so as to lower the percentage of lead in the tailings, which has at times in the mast true as higher. past run as high as 5 per cent,-Pioche

The Nevada-Utah company, under its option on the Pioche Consolidated Mining & Reduction company's properties here, having removed part of the building of the M. V. No. 5 works and

moved the big engine there, are tations and this will be used for pur-poses of timbering o. 5 shaft. It is ex-posed that electric hoists and pumps will be used when work is fully going, and little, if any, of the present steam machinery on the various mines will be but into service again. With a railroad tere to haul the stuff out, it is expect-ed to put it all to the scrap pile; for ed to put it all in the scrap pile for junk, as has been done with much sim-liar machinery on the coast within the past few years.—Pioche Record.

Stock Broker, Tel. Bell 702. 161 S. Main St.

LOCAL MARKETS.

There are few changes in today's local markets. Cache valley oats are arriv-ing, of excellent quality, but not great ing, of excellent quality, but not great in quantity as expected, and are selling at recent standard prices for the present. Utah fruits are arriving in good quality and supply, and taking the place of fruits grown out of the state. A car of bananas is at hand, so that the local supply is good. However, there is a scarcity in the east. Egg plant is being received in good shape. Limes are scarce and doubled in price, selling in San Francisco at \$12 per case. Valencia oranges are bringing \$5 per case, and making fine eating.

Yellow Danver onions are being re-

Yellow Danver onions are being re-ceived from Sacramento; so are white muscats. There does not seem to be much of a demand for the red variety. There is a slight tendency in cheese to rise, on account of the growing scarcity. The following prices are those obtaining in today's markets:

MARK THE OPENING

Some of the Most Prominent Stocks, However, Showed Slight Declines.

THEY FELL ONE-HALF BELOW

The Closing Prices Yesterday-Dela-Ware & Hudson Took a Balloon Ascension of Ten Points.

New York, Aug. 10 .- There were some brisk advances as a result of the opening dealings in the stock market, but some of the most prominent stocks show-ed some declines. The first 3,000 shares of Smelting sold simultaneously at 129% and 130 compared with 129% last night, and the gain was subsequently extended to a full point. National Enameling continued its downward course on the passing of the dividend with a loss of 2 points. Standard stocks derived little enefit from the spectacular rise in some of the high priced usually inactive stocks and room traders sold stocks gradually until the entire market became undermined. Before the decline had attained much of an impetus, Lackawanna had soared to 4581/4731/2 point jump. Delaware & Hudson was quoted 51/4 higher. Practically all of the active stocks fell 1/2 to % below yesterday's closing. Northern Pacific yielded 2, Pacific Coast second preferred

low yesterday's closing. Northern Pacific yielded 2. Pacific Coast second preferred 1½. There were good recoveries at around at 11 o'clock. The recovery in prices came to a halt at about last night's closing level, although individual stocks continued to advance. Atchison was prominent with a rise of 1½. New York Central advanced as much. North American and Smelting preferred lost 1. The market became duil with the approach of the noon hour for the publication of the government monthly crop report.

Eonds were irregular.

One stock after another was taken hold of and bid up sensationally. The inception of the movement lay in the buoyant advance in Delaware & Hudson, that stock rising over 10 points to 215. Moderate purchases of some of the western favorites brought a good response. National Enameling recovered a bit of its morning loss of 2 points. Allis-Chaimers fell off 1 and United Railway Investment 1½.

Speculation became sluggish and irregular, the boom in the gilt edge stocks causing more uneasiness than confidence. Eventually the extravagant bidding up of the high priced stocks ceased and they reacted in common with the general market. The advances included 19½ points in Delaware & Hudson to 224; 19½ in Lackawanna to 468½; 9 in Central Railroad of New Jersey to 220, and 5 in Chicago, St. Paul, Minneapolis and Omaha at 199. The break in Delaware & Hudson carried it back from 224 to 216, while New Haven lost 2½ and Hilnois Central 1½. Prices in the general list fell back in sympathy to last night's level.

PRODUCE.

FCHICAGO. Chicago. Aug. 10.—A fair demand from commission houses held the wheat markot here steady today. Almost perfect weather for the maturing of the spring sown crop prevailed. Prices at Liverpoot were a trifle lower and this tended to augment bearlsh sentiment here. September opened a shade higher to 120½ lower at 27% to 83½. After selling at 83%, the prices settled back to 83½. Minneapolis, Duluth and Chicago reported receipts of 490 cars against 24% a year ago.

Active support from bull leaders caused a firm tone in the corn market. Higher prices at Liverpool added to the bullishness. September opened a shade higher at 53%, sold up to 53% and then cased off to 535.

Oats were firm on mederate demand

ishness. September opened a shade nigher at 53%, sold up to 53% and then eased off to 53% were firm on moderate demand fro mshorts. Offerings were light. September opened unchanged to ½ higher at 25% to 25% and for a time held within the opening range.

Pair demand from packers created firmness in provisions. September pork was up 5 cents at 14.25; lard was up 2% at 1.72%, and ribs were unchanged at 8.49. Cash: Wheat—No. 2, red, 83½55; No. 3, part, 81½55; No. 3, part, 81½55; No. 3, spring, 85395.

Corn—No. 2, 553554; No. 3, 55354.

Later the market broke sharply on profit taking brought out by the bearish tone of the government crop report. According to official statistics the total crop of wheat for the United States is estimated at 674,400,000 bushels. Under the selling September dropped to 5½4634.

The market closed weak, with September off 127½, at 82.

Corn—The issuance of the crop report had practically no effect on the market, prices holding steady throughout the remainder of the seasion. The close was steady with September up a shade at 55%. Close: Wheat—Aug. 81½; Sept. 82; Dec. 27½, May. 25%.

Corn—Sept. 53%; Sopt. 26%; Dec. 27½, May. 25%.

Pork—Sept. 73, Oct. 7,71%; Nov. 7,60.

Onts—Aug., 26%; Sept., 26%; Dec., 24, 25%; Apr., 25%; Apr., 25%; Oct., 14,12½; Card.—Sept., 7.70; Oct., 7.77½; Nov., 7.60; Occ., 7.30; Jan., 7.25, Ribs—Sept., 8,37½; Oct., 8,45, Rve—Cash., 5045½½; Flax—Cash., northwestern, 147, Timothy—Sept., 3,4568,50, Clover—Aug., 12,75, Barley—Cash., 39743.
